Title : Apparatus for Creating Therapeutic Charge
Transfer in Tissue
Docket No. : LDP-8080CIP
Customer No. : 54962

PETITION TO MAKE SPECIAL UNDER 37 CFR 1.102(b)

Mail Stop Petition
Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Honorable Commissioner:

According to 37 CFR 1.102(b) and MPEP § 708.02 XII, Applicant requests that the above-captioned application be granted SPECIAL STATUS because the application relates to biotechnology and the Applicant is a small entity.

Applicant has established its small entity status previously and again confirms it.

130.00 OP

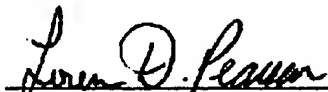

Appl. No. 10/801,168
Petition Dated January 20, 2006

The invention of the instant application is a major asset of the Applicant. Applicant is a startup company whose main purpose is to develop the technology included in the patent application. The remaining assets owned by the Applicant are ancillary to the invention and include the hardware and devices that are embodiments of the invention of the instant application.

The development of the technology will be significantly impaired if examination of the patent application is delayed. Applicants have had successful clinical trials using the invention. Specific investors are interested in contributing significant amounts of capital that could be used for additional devices and improvements as well as additional clinical trials. However, until the patent application has been prosecuted, the true value of the invention remains speculative. Accordingly, investors are afraid of investing and the true value of the invention is not able to be determined. This investment is needed to provide the capital for additional hardware and trials. Therefore, the development of the technology will be significantly impaired if additional capital is not added, which in turn is dependent on the expedient examination of the instant application.

Applicant has attached a payment of \$130 to provide for this petition.

Respectfully submitted,

LOREN DONALD PEARSON
